**AMICO INTRODUCES SS304 AND SS316 LATH
STAINLESS STEEL MAX PROTECTION ANYWHERE!**

Birmingham, AL – Alabama Metal Industries Corporation (AMICO) has announced the introduction of SS304 and SS316 to its industry-leading lath product offering, now enabling architects, contractors and customers of all size and scope to order the maximum protection of stainless steel lath in a cost effective, timely manner. Listed as “Stainless Steel Lath” in the AMICO 2008 Metal Lath and Accessories catalogue, AMICO’s two newest standard lath offerings include:

SS304

- Available as a product providing an excellent corrosive resistant material for specialty lath applications.
- Product can be used over insulation boards to carry conventional stucco finishes and for external insulation requirements.

SS316

- Used for swimming pool applications to provide an additional resistance to pool cleaning chemicals.
- Also used for lathing in coastal locations where atmospheric salt is a concern.

| Weight/ sq. yard | Alloy | Sheet weight | Sheet size | Sheets/ bundle |
|-----------------------------|--------------|-------------------------|-----------------------|---------------------------|
| 1.75 lbs. | 304 or 316 | approx 3.50 lbs. | 27½" x 96" | 10 |
| 2.5 lbs. | 304 or 316 | approx 5.00 lbs. | 27½" x 96" | 10 |
| 3.4 lbs. | 304 or 316 | approx 6.80 lbs. | 27½" x 96" | 10 |

“While stainless steel lath is not new to the industry, AMICO is proud to be the first company to offer this outstanding product as a standard item in our comprehensive line of lath products,” said Chris Little, AMICO Product Manager. “When a customer needs maximum protection in aquatic, coastal or virtually any application, AMICO has both SS316 and SS304 product on the shelf, in addition to the manufacturing capacity to fill any order.”
