

Soffit Vent Inserts

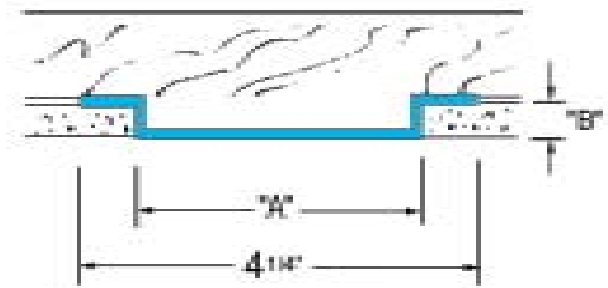

AMICO Soffit Vent Inserts

2", 3" & 4" Soffit Vent Inserts provide continuous attic ventilation through the perforated surface. Shoulders are a full 3/8 inch deep to protect sheathing edges and to provide a caulking surface. This product is often installed directly to the bottom of the joist, prior to the installation of the sheathing. This provides a continuous airflow along the entire length of the soffit.

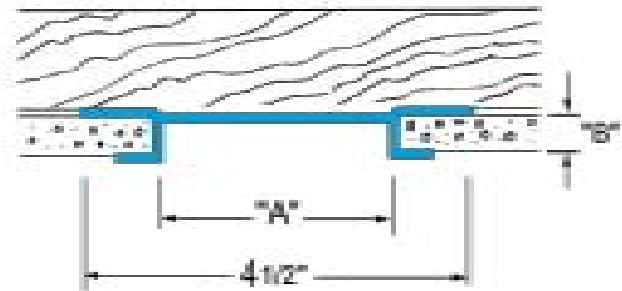

AMICO Soffit Vent

for Sheathing provides continuous attic ventilation like our soffit insert, while offering better protection to the edges of sheathing, this may eliminate the need for caulking in some cases.

Standard Length 10 Feet

Drywall Soffit Vent Inserts
