AMICO Rigid Vinyl (PVC) Beads

2. MANUFACTURER

AMICO

Alabama Metal Industries Corporation

P.O. Box 3928

Birmingham, AL 35208

Telephone: 800-366-2642

Facsimile: 205-780-3303

3. DESCRIPTION AND PERFORMANCE

Drywall accessories are manufactured from the highest quality exterior grade vinyl compounds, which are specially formulated for exterior applications. These beads are designed to function at optimum levels in most climatic conditions for many years of service.

Long Lasting:

AMICO bead products will not rust, peel, or affect the plaster mix in any way. Accessories will hold their shape, and stay true and straight when installed properly.

Thru-Color:

The color is solid throughout the product. They are not coated, there is nothing to peel or chip.

Paint Adhesion:

Excellent with no preparation required.

Flammability:

PVC products will not support or spread flames, They are self extinguishing as soon as the flame source is removed, therefore, it will not start a fire. All AMICO vinyl bead products meet code requirements for smoke and flame spread as stated in ASTM-E84. Rigid vinyl will not conduct electricity and offers a very low thermal conductivity.

Adhesion of Drywall Accessories:

All AMICO Vinyl Drywall Beads are provided with adequate perforations to allow complete embedment. Many drywall products have serrations on the flange. This aids in the adhesion of the finish to the drywall accessory. This allows all drywall accessories to key to the attached gypsum board for complete bonding of the system. Perforations allow the finishing compound to penetrate the bead and allow the complete bonding of the joint compound.
