

# Foundation Weep Screed

Stucco Accessories

Spring 2002

AMICO

Foundation Weep Screed

provides a straight and true screed surface at the base of stucco walls, while allowing excess moisture to escape the back of the stucco membrane. It is important for the water-resistant backing paper and metal lath to overlap the nailing flange of the weep screed in order to guide the water to the exterior. Check with local building codes for the proper clearance above grade. This bead is required by most building codes in the United States.

Foundation Weep Screed

Note: Unpunched Foundation Weep Screed has only a slotted nail hole punchout in the Flange.

Standard Length: 10 feet

PRODUCT NO.	DIMENSIONS	GROUND	PEICES PER BOX
FOUNDATION WEEP SCREED AMFWS-425-380	4 1/4"	3/8"	30
